

# ***Xpand NT™*** ***Multi-Use Iris Expansion System***

***"Xpand Your View"***

***"For the cost, ease of use and effectiveness, the Xpand NT is absolutely the best pupillary expander available."*** - Charles H. Williamson, M.D., Baton Rouge, LA

***"I have found the Xpand NT pupil expander to be the most effective device that allows me to perform femto second laser capsulotomy and lens fragmentation in patients with small pupils."*** - Y. Ralph Chu, M.D., Bloomington, MN

***"The Xpand NT is an excellent, cost effective alternative for pupil expansion."***  
- Richard J. Ruckman, M.D., Lufkin, TX

***"The Xpand NT offers the perfect combination of efficacy and low cost."***  
- Daniel K. Bregman, M.D., Nashville, TN

***"The Xpand NT greatly reduces my stress level when performing cataract surgery through small pupils. It is easily implanted, positioned and explanted, adding less than two minutes total to my operating times. I no longer stress about small pupils or IFIS when I have the Xpand NT nearby."***  
- John D. Willer, D.O., Hood River, OR

**Speculum** \ˈspek-yə-ləm\, noun, A medical instrument for rendering a part accessible to observation, as by enlarging an orifice.

**Xpand NT Iris Speculum** \x-ˈspand\ ˈlen-ti\ ˈī-rəs\ ˈspek-yə-ləm\, noun, The latest, most advanced technology available to enlarge the pupil.
